

## The APP and your opportunities in the digital revolution!

- ▶ Help shape a world of fair cooperation!
- ▶ Discover people and the world!
- ▶ Advertise yourself and your business! With „Points“ on the digital world map.

[www.doitll.com](http://www.doitll.com)

## Why doitll®?

We want to give **every person** worldwide the opportunity present themselves and do business on the basis of their abilities, services and offers, **without** commissions.

doitll® unites **local searches**, **social networks** and **a trading platform** into a single app under [www.doitll.com](http://www.doitll.com).

## What is doitll®?

- ▶ New search and discover function on the basis of offers and needs
- ▶ Combination of many services in one platform (trade, social network, discover of environment)
- ▶ doitll® isn't based on the earnings of individuals
- ▶ The user determines whether advertisements are shown
- ▶ The user creates and designs the content

## What distinguishes us from other platforms? What's new?

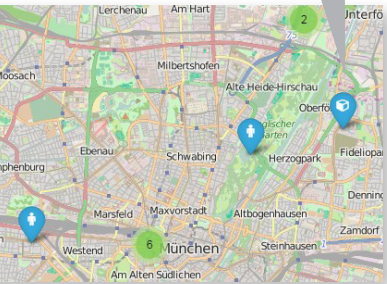

## What do we do with the user data?

▶ **NOTHING!**

- ▶ Data analysis is only used for development in order to make the app better
- ▶ We operate our servers in Germany
- ▶ The user can check or delete his/her generated data completely anytime
- ▶ Data are not sold to third parties
- ▶ Modern data-protection technologies and encryption are used

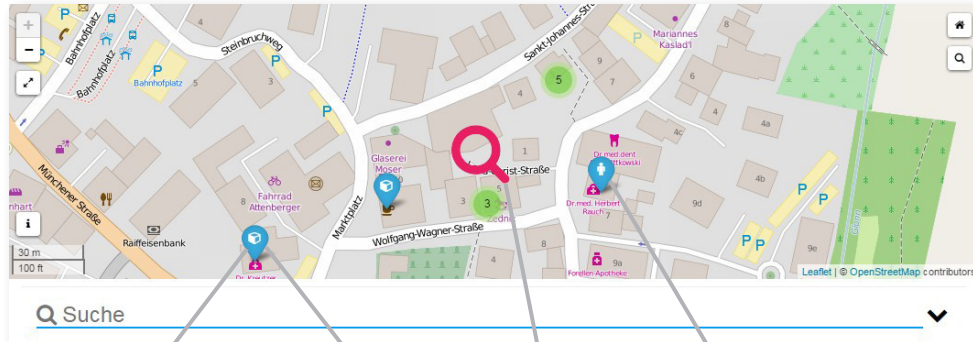

## How does doitll® work?

On a **digital world map**, the user creates simple „POINTS“ (markings on the map) that represent him/herself, his/her company/activities, offers and abilities (yourpoints, eventpoints, tradepoints, foodpoints, needpoints).

doitll® offers the possibility of exploring your area using a **virtual magnifying glass** on the map or using a direct search term in order to find people, businesses or offers locally or throughout the world.

## Practical example:

Hans Huber increases his visibility to better get into contact with people.

Hans Huber sells his bicycle.

Hans Huber uses the magnifying glass to discover what is in his area.

Hans Huber presents his „takeaway“ as a „FOODPOINT“ and provides information about his menu.

Hans Huber

- ▶ A retailer places her business and goods on **doittl**® online. Now potential customers can search for products that are in their immediate area.

***Benefits:** Strengthens local business (through digitization, no commission), local searches at the product level, protection of the environment (short transport routes)*

- ▶ A craftsman places his work online on **doittl**® to present his services and publish job offers.

***Benefits:** Search for craftsmen in the area, easy communication via chat, no costs for job ads.*

- ▶ Someone places their profile on **doittl**® and makes themselves visible on the map or the list (area).

***Benefits:** The person can be found through their personal profile and present their interests and abilities to the public. New „friendships“ and „contacts“ can be created locally or throughout the world, and cooperation can take place. For example, find a French/German teacher in Africa or just place private offers/services online (flea market).*

- ▶ Hans Huber is new to town and needs a space cut in his countertop for a sink. Unfortunately he doesn't have the tools for the job or the ability to do this kind of work.

*No problem! He places an offer "POINT" on **doittl**®. And he quickly gets a message from Josef Lechner who is a master carpenter and is looking for new jobs. They make a "deal" so both their interests are served quickly and easily.*

Example of the application and use of doittl®

# Help us to help you to help the world!

## Why?

- ▶ To offer you a platform that supports your business in a transparent and fair way without compromises!
- ▶ To remain independent of the influence of large investors.
- ▶ To bring **doitll**® to the market as quickly as possible worldwide.

## Because things can't just keep going this way in world.

- ▶ To create a business that isn't just driven by profits but offers the opportunity to invest in developments and things that improve the world. To do this, we invest 51% of the revenue. As a user, you can actively contribute to how we work.
